### **Shell Commits to Report Greenhouse Gas Emissions with CA Registry**

LOS ANGELES, California – Shell Oil Company (Shell) has joined the California Climate Action Registry (Registry), a distinguished group of organizations demonstrating leadership by voluntarily taking action on climate change. As a member, Shell will work with the Registry to annually track, report and certify its greenhouse gas emissions, the main drivers of global warming.

“Shell believes that any emissions program must have a reliable monitoring process and tracking system, beginning with an accurate emission inventory. Our participation is a reasonable first step in supporting California’s greenhouse gas control efforts,” said Aamir Farid, Shell’s general manager at its Martinez, California refinery.

The Registry, created by the California legislature in 2000, helps companies and organizations throughout the United States to track, publicly report and reduce their greenhouse gas emissions. The results are certified by independent third-parties to ensure compliance with Registry protocols and standardization across participants and sectors. The Registry has been widely recognized as a gold standard for public reporting of greenhouse gases.

“The oil & gas sector has an important role to play in the fight against climate change” said Diane Wittenberg, President of the California Climate Action Registry. “We are excited that Shell will track its efforts to address climate change in our registry and encourage other oil and gas companies to do the same.”

**Shell Oil Company**, including its consolidated companies and its share in equity companies, is one of America’s leading oil and natural gas producers, natural gas marketers, gasoline marketers and petrochemical manufacturers. Shell, a leading oil and gas producer in the deepwater Gulf of Mexico, is a recognized pioneer in oil and gas exploration and production technology. Shell Oil Company is an affiliate of The Shell Group, which operates in over 140 countries and territories employing more than 112,000 people. [www.shellus.com](http://www.shellus.com)

**The California Climate Action Registry** is a non-profit public/private partnership that serves as a voluntary greenhouse gas (GHG) registry to protect, encourage, and promote early actions to reduce GHG emissions. Over 70 major companies, cities, government agencies and NGOs measure and publicly report their GHG emissions through the Registry. [www.climateregistry.org](http://www.climateregistry.org)
