## Let's Get Started

E.H. Pechan and Associates, Inc.  
[www.pechan.com](http://www.pechan.com)

The global community agrees -- climate change is a real and current threat that must be addressed. Even in the absence of a practical federal policy, many states, cities, counties and other public, as well as private entities are taking the initiative to develop strategic plans and to identify, track, and mitigate greenhouse gas emissions. Why? Because communities and businesses need to understand the potential opportunities, risks, and strategies related to climate change now in order to be successful operating in a carbon-constrained future.

## Climate Change Support Services

### Our Clients Include:

- U.S. Environmental Protection Agency
- Port Authority of New York and New Jersey

- Mitigation Option Assessment
- Corporate GHG Management Plans
- Community Action Plans
- Benefits & Costs Quantification
- Inventory Verification
- Project Verification
- Clean Technology Assessment
- Energy Efficiency
- Policy Development
- Economic Analysis
- Stakeholder Support

### WHO WE ARE

Pechan is an environmental consulting firm that provides climate change, air quality, and information technology consulting services to both public and private clients.

Pechan has a broad range of experience in assessing climate change and air quality issues covering all emissions sources and sinks.

We work with clients to determine the extent and magnitude to which GHG issues impact their financial and operational performance.

Pechan also helps position our clients for possible future

regulatory environments and markets.

Solving climate change and air quality challenges are the cornerstones of our practice!

### CLIMATE CHANGE ACTION PLANS

Many states, cities, counties and other public and private entities are developing Climate Change Action Plans to help mitigate anthropogenic GHG emissions and to adapt to a changing climate.

Pechan works with agencies and stakeholder groups to develop their Action Plans through our collaboration with the Center for Climate Strategies.

This work includes the development of GHG inventories and forecasts, technical workgroup facilitation, technical analysis of policy options, and policy development.

### GHG MANAGEMENT SERVICES

Pechan is an approved verifier and technical assistance provider for members of the California Climate Action Registry.

Pechan has verified GHG emission inventories for Registry members since 2004.

Pechan is an approved verifier for the Registry's General Reporting Protocol, Power/Utility Protocol, and the Forestry Protocols.

### GHG EMISSION INVENTORIES

Pechan develops facility-level inventories to establish organizational baselines, for submittal to the Registry, or for top-down state and regional assessments.
